TREFFPACK

TREFFPACK

Treffpack is a German company, which markets quality packaging in Europe within 3 product groups: plastics, glass and closures.

Our core competences: In addition to an extensive standard range, we are a strong and creative partner for the development of new packaging from concept to finished solution. With a wide range of closures Treffpack can always provide a complete package solution. This makes it easy to cooperate with us.

Solid network: We cooperate with selected leading European manufacturers. Thereby, we can make the necessary know-how available and ensure a professional service. This ensures our customers premium packaging solutions – regardless of the choice of materials or technology.

Partnership: Treffpack is part of the reputable family owned group Packaging Alliance Europe with roots and experience from the late 1800. The group has offices in 8 countries covering the Central, Western and Northern part of Europe. The group has a widespread and rewarding cooperation within a.o. inspiration, sourcing, development and quality, benefiting all our customers.

SPIRITS BOTTLES

Fine bottles
for all types
of spirits
– complete your
packaging with
the perfect
closure

Decades of experience and an extensive cooperation with leading European glass manufacturers makes us an independent, attractive and dynamic supplier of glass packaging for all kinds of alcohol. This enables us to deliver everything from a very competitive bottle to the very unique glass packaging for premium products.

Further profiling of glass bottles is made through an extensive cooperation with specialists in decorations such as screen printing, sleeving, frosting and satin coating or a combination of these techniques.

You can rely on Treffpack for development of new glass bottles. This is done in close cooperation with selected glass manufacturers.

We convert your design ideas promptly and inhouse into 3D drawings and guide you in the whole process to the supply of the finished products including financing and stock keeping.

Or let us find an existing standard bottle somewhere in Europe, meeting the requirements for a new glass packaging. Often we can also modify a standard bottle, for instance with a new finish. It saves time and money for investment. We call this unique standard.

With a large selection of appropriate closures, we are a one-stop-shop for complete packaging solutions. We take the full responsibility for the whole packaging, ensuring function, usability and durability of the products.

This overview is just a selection of the possibilities. If you do not find the perfect bottles for your product, please contact us.

As a highly motivated team of entrepreneurs, we look forward to getting to know you and your packaging challenges, so that we can find the ideal solution together.

Decoration

Make your glass bottle truly exclusive – the role of the packaging as an eye-catcher is always important

Coating / Screen printing

Embossing / Foilstamp / Coating

With various decoration and coating techniques we can offer an optimal look which stands out on the shelves. A genuine brand builder for premium products. The possibilities almost go beyond imagination. Often combinations of the various methods are possible. We can among other offer the following, do not hesitate to contact us for a presentation:

Coating

Color spraying of the bottles, full or partial coverage. Lots of choices for finishes like matt, glossy, translucent, and metallic. Can also be used as an UV protection.

Metallization

Special effect in glossy or matt for extra premium products for instance for unique editions.

Coating / Screen printing

Sleeving

Screen printing

Quality printing with a very good color coverage in multiple colors. The consumer can feel the print giving an extra attention when grabbing the bottle from the shelf. Heat treatment makes the print very resistant.

Printing is often possible, where the bottles cannot be labelled like on edges and curves and combinations with other techniques like coating is also an option.

Screen printing

Foil stamp

A technique for achieving a shiny metallic effect. Several colors can be used also in combination with screen printing and coating.

Sleeving/labelling

Avoid investment in equipment and downtime, let us help with the sleeving or labelling as well as stock keeping. Alternatively in connection with special promotional editions.

Coating / Frosting

Complete your packaging with the perfect closure

Pilfer proof closures

Stopper corks

A suitable and beautiful bottle is of course a must. But the importance of a perfect closure is sometimes overlooked.

With a large selection of closures in various materials like aluminum, steel, plastics, natural and synthetic corks, we can always offer a complete packaging solution. Let our vast experience guide you to the optimal solution. We take responsibility for functionality, security and user friendliness. This makes it easy and safe to work with Treffpack.

Stopper corks

We carry a range of all kinds of imaginal stopper corks in various materials like synthetic and natural corks, glass, aluminium, steel and wood. The top can be personalized by techniques like embossing, printing and laser.

Pilfer proof closures

Treffpack offers pilfer proof closures in aluminium with the correct liner, compound or insert ensuring the functionality. Added value is achieved through for instance top and side printing or shaving.

Thermo caps

As icing on the "cake", Treffpack offers a wide range of thermo caps in various sizes, with optional off-set printing and hot stamp on the top or side with and without tear-off strip etc.

We are always available for further information.

Thermo caps

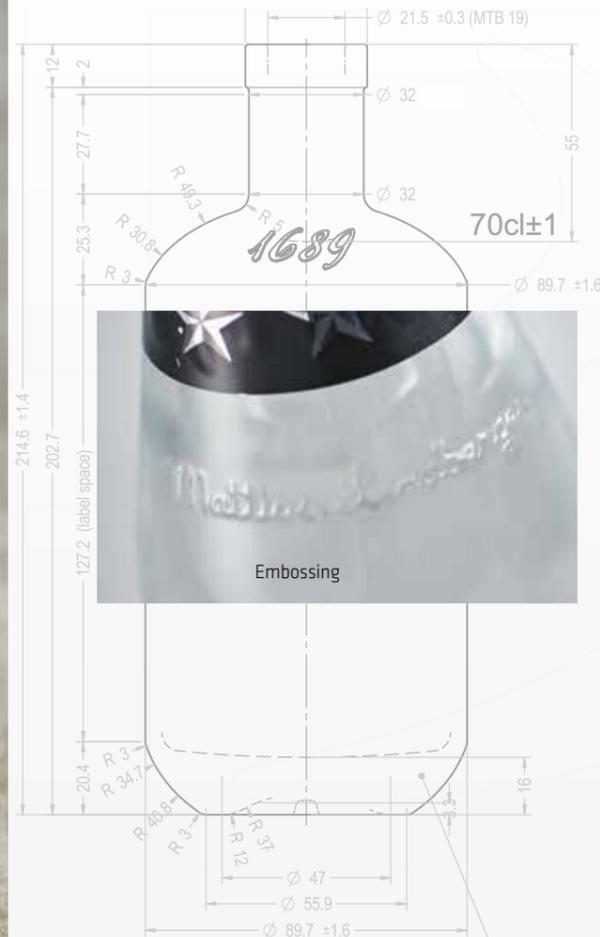

Design your own bottle

Work with us on the perfect bottle for your next project

Treffpack develops new glass bottles in close cooperation with selected glass manufacturers.

With decades of experience, let us lead you through the whole process. We take all aspects into account, ensuring a perfect result without unexpected pitfalls.

Starting with your idea we arrange inhouse 3Drawings and models and we make sure important points like palletizing, transport, depalletizing, filling, closing, palletizing and not least sales and marketing performance on the shelves and at the consumers are taken into account.

Embossing

Make your own bottle even more unique by adding an embossing which really catches the consumers attention with the 3 D profile of logos or illustrations.

Why EXCELLENCY IN PACKAGING

Treffpack offers advice, market and product know how in the whole life cycle of the packaging process – from idea to disposal.

TEAM Treffpack cooperates with selected European packaging manufacturers. With their support we can always provide a professional, efficient and competent service.

COMPLETE SOLUTION: With a large selection of closures produced in plastic, steel, aluminum and wood can we always offer a complete packaging solution. We take responsibility for functionality, security and user friendliness. This makes it easy to work with Treffpack.

INSPIRATION: We keep an eye on movements and trends in the retail and packaging market so we understand your market and your wishes. The broad product line enables Treffpack to offer a reduction in the number of suppliers with each customer – in many cases, we are the single supplier of primary packaging.

STOCK/FILLING/CLOSING/RETAIL: Our competences extend beyond the packaging itself: We can always support our customers in issues like stock keeping, handling, filling, closing, shelf life and how they work in the retail stores as well as environment and disposal. After sales support is of course also an integrated part of our business.

QUALITY: We particularly focus on compliance with quality standards. Through our partnership, we can offer inhouse certified auditors. In this way we verify that all quality and safety standard are strictly adhered to – a crucial added value for our customers.

ENVIRONMENT: We are always available with information about sustainability, legislation and packing taxes as well as re-use and disposal in your country.
